type certificated means issued with a type certificate or type acceptance certificate.

type acceptance certificate means a type acceptance certificate issued under regulation 21.029A.

type certificate: see regulation 21.041.

Excerpt from Part 2 of the CASR Dictionary

75 Definition of *passenger transport operation*

(1) A ***passenger transport operation*** is an operation of an aircraft that involves the carriage of passengers, whether or not cargo is also carried on the aircraft.

(2) Despite subclause (1), an operation is not a ***passenger transport operation*** if the operation is:

(a) an operation of an aircraft with a special certificate of airworthiness; or

(b) a cost-sharing flight; or

(c) a medical transport operation; or

(d) if the registered operator of an aircraft is an individual—an operation of the aircraft:

(i) that involves the carriage of that individual; and

(ii) does not also involve the carriage of other passengers; or

(e) if the registered operator of an aircraft is an individual—an operation of the aircraft:

(i) that involves the carriage of that individual; and

(ii) involves the carriage of other passengers; and

(iii) for which no payment or reward is made or given in relation to the carriage of the other passengers or cargo.

21.041 Type certificates—meaning

(1) In these Regulations, unless the contrary intention appears:

type certificate, for an aircraft, aircraft engine or propeller, means a type certificate issued by CASA under regulation 21.013A or 21.029 certifying that the aircraft, aircraft engine or propeller meets the airworthiness standard mentioned for it in the certificate.

Source FARs section 21.41 modified.

21.175 Certificates of airworthiness: classification

In these Regulations:

special certificate of airworthiness means:

(a) a certificate of airworthiness issued for:

(i) an aircraft type certificated in the primary, intermediate or restricted category; or

(ii) an aircraft in the limited category; or

(iii) an amateur-built aircraft accepted under an ABAA; or

(iv) a light sport aircraft covered by regulation 21.186; or

(b) a provisional certificate of airworthiness; or

(c) an experimental certificate.

standard certificate of airworthiness means a certificate of airworthiness issued for:

(a) an aircraft type certificated in the normal, utility, acrobatic, commuter, or transport category; or

(b) a manned free balloon; or

(c) an aircraft in a special class of aircraft.

Source FARs section 21.175 modified.
