Purpose of this form

Use this form to provide details of plume rises from proposed developments to CASA.

Who is this form for?

This form is for proponents of a development that will generate an exhaust plume which may create a risk to the safety of aircraft operations. At the time of submitting this form whether there is a risk to the safety of aircraft operations may not be known. It is for CASA to determine such an outcome given all considered input which is to be assessed whether it may create a risk to the safety of aircraft operation.

Privacy

Any personal information you provide to CASA is protected by the Privacy Act 1988 (Cth). CASA can only collect, use and disclose that information in accordance with that Act.

CASA will use the information collected in this form for purposes associated with performing its functions under civil aviation legislation and other Australian laws.

Email address

Proposed facility and prior consultation

2 What are the **proposed facility** details?

Type of facility

Location of the nearest town (direction and distance)

Location of the facility in latitude and longitude (degrees, minutes, seconds)

Proximity to any other existing or planned facility that generates a plume rise (if known)

Distance to the nearest aerodrome or landing area including helicopter landing sites

Height of the stack or tallest structure at the site Above Ground Level (AGL)

Elevation of the location of the facility Above Mean Sea Level (AMSL)

Date the facility will commence operation (DD/MM/YYYY)

 / /

3 What are the parameters of the facility if a **single stack** is proposed?

Stack exit velocity (metres per second)

Stack exit temperature (degrees Celsius)

Stack diameter (metres)

Stack height (metres above ground level)

4 What are the median, mean and range for each stack of the following parameters if **multiple stacks** are proposed?

Stack separation distance (metres)

Stack exit velocity (metres per second)

Stack exit temperature (degrees Celsius)

Stack diameter (metres)

Stack height (metres above ground level)

5 What are the parameters for the **worst case scenario** for facilities with **multiple configurations**?

Stack separation distance (metres)

Stack exit velocity (metres per second)

Stack exit temperature (degrees Celsius)

Stack diameter (metres)

Stack height (metres above ground level)

6 What are the parameters for the **normal operating scenario** for facilities with **multiple configurations**?

Stack separation distance (metres)

Stack exit velocity (metres per second)

Stack exit temperature (degrees Celsius)

Stack diameter (metres)

Stack height (metres above ground level)

7 What are the details of any **prior consultation** with CASA, Dept of Defence, Aerodrome Operator or other relevant party?
